*"AI is your first hire. Brief it well,
and the work begins."*

You opened ChatGPT or Claude once, asked a question, glanced at the answer, and closed the tab. The interaction lasted under a minute and produced a mediocre result. You walked away thinking AI was overrated, or that it works for other people but somehow not for you.

This book is built around one simple frame. AI is your first hire. Brief it the way you would brief a smart new colleague, and the work begins. Skip the briefing, and you get the generic output you have already learned to dismiss.

In forty-four short chapters, you will move from curious to confident. Each chapter takes about twenty minutes and gives you something you can use the next day: a reusable brief, a sharper question, a habit that compounds across years.

This is not a book about AI. It is a book about you, helping you complete work that used to require more manual effort, in a fraction of the time, with more of your judgment showing through.

Enrique Rubio is the founder and CEO of Hacking HR and its credentialing arm, the People and Culture Strategy Institute, communities of practice operating at the intersection of HR, technology, and the future of work. He writes at enriquerubio.ai.

AI for Beginners

ENRIQUE RUBIO

• PRACTICAL. CLEAR. EMPOWERING. •

AI *for* Beginners

A PRACTICAL PATH FROM CURIOUS TO CONFIDENT.

ASK

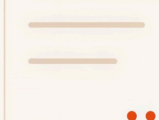

Start with a question.
Spark ideas.
Find clarity.

PROMPT

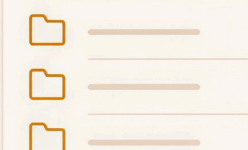

“
Great results
start with
a great prompt.”

EXAMPLE

ORGANIZE

Save, sort, and
structure what
matters.

APPLY

Turn insights
into action.
Make it useful.
